## PROFESSIONAL LIABILITY INSURANCE FOR Architects, Engineers & Other Building Professions

**T**here is currently an explosion of interest in professional liability insurance. Professionals are finding it a prerequisite in many of their projects to maintain coverage. The requirements stem from a genuine concern that Professionals in Singapore like their counterparts in the west are increasingly facing serious professional negligence claims. The claims arise from losses or damages sustained by clients arising from alleged defective work. As Singaporeans become better educated and informed, they are becoming more assertive of their rights and among other things suing negligent professionals.

While some see Professional Indemnity Insurance as an expensive and unnecessary overhead, many are starting to realise that cover can help them meet the costs of defending claims and any damages payable. Certainly a growing body of case law attests that the courts take a dim view of negligent professionals. We have been helping increasing numbers of professionals and their clients to take insurance protection. Some clients specify and even pay for such coverage as a pre-requisite to allowing their professionals to begin work. It is a statutory requirement for many professions like Lawyers, Accredited Checkers and Corporate Accountants among others. Insurance cover allows the professionals to settle legitimate claims and also to defend non-valid ones. Without cover, a single claim can knock out a firm. Given the risks, professionals and their clients should consider taking insurance against negligence claims as a priority.

Able Insurance Brokers Pte Ltd is pooling more than 33 years of experience providing quality professional indemnity insurance for all types of professional practices to bring you this cover. *Whether you are a client or a professional, phone us with your questions or fax us your Enquiry Form.*
