Case Study

Michael is an engineer who designs the supporting foundations of a residential property. He makes an error with the site calculations – which leads to the slab cracking and damage to the property of the owner. His company is liable for this loss, which could be anywhere between \$150,000 up to the full value of the house.

But because Michael has professional indemnity insurance, he's covered for this amount – as well as any legal expenses if the matter goes to court.
